Section Introduction, Phishing Emails

Blue Team Level 1 Certification (Standard) > PA2) Types of Phishing Emails > Section Introduction, ...

COMPLETE

This section of the Phishing Analysis domain will introduce you to the different types of phishing emails that you are likely to encounter. Whilst most email attacks are trying to do the same thing, like getting a user to download a malicious file or enter their account details into a fake website, there are several ways of trying to do this, and some are more effective than others. We will look at 7 different types of phishing emails, as well as social engineering techniques and what false positives are.

LEARNING OBJECTIVES

By the end of this section you will have achieved the following objectives:

- Understand the different types of phishing attacks that malicious actors may use to target individuals and organizations.
- Understand non-email based phishing attacks, such as vishing and smishing.
- Identify and correctly classify suspicious or malicious emails based on the way they are designed, context, and intent.
